

Jackson RateProtector®

Rates effective March 3, 2025

Jackson RateProtector is a single premium, multi-year guaranteed fixed annuity. You may elect to have your initial interest rate guaranteed for a 3-, 5-, or 7-year Guaranteed Option Period. Jackson RateProtector is a long-term, tax-deferred¹ vehicle designed for retirement. Earnings are taxable as ordinary income when distributed and may be subject to a 10% additional tax if withdrawn before age 59½. Premium payments can be most effective if left in place for at least seven years or until retirement. Amounts withdrawn may be subject to withdrawal charges and a market value adjustment, which may reduce the accumulated contract value. The Guaranteed Option Rate is the interest rate that is credited to the contract on an annual basis. After the initial Guaranteed Option Period, renewal interest rates will be guaranteed for one-year periods and will never fall below the contract's declared guaranteed minimum interest rate.

| Current Interest Rates ² | | |
|-------------------------------------|------------------------------------|------------------------|
| Guaranteed Option Period | Premium | Guaranteed Option Rate |
| 3-Year | Less than \$100,000 | 4.40% |
| | \$100,000 ³ and Greater | 4.70% |
| 5-Year | Less than \$100,000 | 4.70% |
| | \$100,000 ³ and Greater | 5.00% |
| 7-Year | Less than \$100,000 | 4.70% |
| | \$100,000 ³ and Greater | 5.00% |

The guaranteed minimum interest rate (GMIR) is currently 2.65%. The GMIR is recalculated annually after the initial guaranteed option period. The guaranteed minimum interest rate will be declared each calendar year and will fall between 1% and 3%.

¹ Tax deferral offers no additional value if an IRA or a qualified plan, such as a 401(k), is used to fund an annuity and may be found at a lower cost in other investment products. It also may not be available if the annuity is owned by a legal entity such as a corporation or certain types of trusts.

² Interest rates effective as of 3/3/2025 and subject to change without notice. Premium in the Guaranteed Option Periods earns interest at a rate never less than the guaranteed minimum interest rate (GMIR). The GMIR may range from a minimum of 1% to a maximum of 3%. The rate credited to the funds allocated to a Guaranteed Option Period will be the Guaranteed Option Rate, defined as the greater of the declared rate at the time of allocation or the GMIR. The Guaranteed Option Rate is guaranteed for the Guaranteed Option Period. The initial GMIR for a new contract is determined upon inception of the contract and guaranteed for the initial Guaranteed Option Period. At the time of allocation, the declared rate may be less than the initial GMIR. However, the Guaranteed Option Rate credited to the initial Guaranteed Option Period will never be less than the initial GMIR. Withdrawals prior to the end of the initial Guaranteed Option Period may be subject to market value adjustments, which may reduce contract value. Market value adjustments do not apply to any 1-year Guaranteed Option Periods following the end of the initial Guaranteed Option Period.

³ Subject to certain restrictions and limitations, higher interest rates may be credited to premiums of \$100,000 or greater. Premiums may not exceed \$1,000,000 without prior approval from the Company.
